PROFESSIONAL SUMMARY

Final-year B.E. student in Artificial Intelligence and Machine Learning with project experience building machine learning models, Agentic AI systems, and analytical dashboards. Skilled in Python, SQL, NLP, and RAG pipelines, with an interest in translating complex data into practical AI solutions.

EDUCATION

Bachelor of Engineering — Artificial Intelligence & Machine Learning

Kalpataru Institute of Technology, Tiptur | Visvesvaraya Technological University (VTU) | 2023–2027 | CGPA: 8.1 | Final Year — Pursuing

Pre-University Course (PUC)

Mangaluru PU College, Hassan | 2021–2023 | 86%

10th Standard (SSLC)

Kitturu Rani Chennamma Residential School, Mandya | 2020–2021 | 94%

PROFESSIONAL EXPERIENCE & INTERNSHIPS

Internship & Training Program — Pentagon Space | 2026

• Selected through campus-wide competitive technical and aptitude evaluations for intensive enterprise training.

• Applying core Python, machine learning pipelines, and scalable software development practices.

Data Science & Machine Learning Internship — Infotact | Completed online internship

• Performed data cleaning, feature engineering, and exploratory data analysis (EDA) on real-world datasets.

• Developed and evaluated predictive machine learning models and derived analytical insights.

TECHNICAL SKILLS

Programming: Python, Java, C, C++

AI / Machine Learning: Machine Learning, NLP, KNN Algorithm, Computer Vision, Model Evaluation

Generative AI & Frameworks: LLMs, RAG, AI Agents, Agentic AI, Multi-Agent Systems, LangChain, LangGraph

Data Analytics & Databases: SQL, Pandas, NumPy, Power BI, Tableau, Data Cleaning, Exploratory Data Analysis (EDA)

Web Development: HTML5, CSS3, JavaScript, React.js, REST APIs

Tools & Platforms: Git, GitHub, Cisco Packet Tracer, VS Code

CERTIFICATIONS & COURSES

Agentic AI (Comprehensive Course)

Agentic AI and Multi-Agent Systems; LLMs and Retrieval-Augmented Generation (RAG); LangChain and LangGraph; Advanced Python and NLP Pipelines.

Cisco Networking Academy — Technical Certifications & Courses

CCNA (Introduction to Networks & Routing); CyberOps Associate & Cybersecurity; Data Science & Analytics Essentials; Python Essentials 1 & 2; Cisco Packet Tracer.

PROJECTS

AI-Based Interview Fraud Detection — Major Project

Stack: Python, AI/ML, Computer Vision, NLP, Integrity Analysis

• Developed a multimodal proctoring system to monitor candidate behavior and support interview integrity.

• Implemented computer vision and audio/visual anomaly detection to flag unauthorized activity and suspicious movements.

• Generated candidate integrity assessment scores and verification audit logs.

AI-Powered Text-to-Audio & Video Platform — Hackathon Project

Stack: Python, NLP, Text-to-Speech, Video Generation APIs, React.js

• Built an AI platform that converts raw text into synchronized narrated audio and video streams.

• Integrated NLP, text-to-speech, and video synthesis APIs with a responsive React.js interface for podcasts and presentations.

• Automated digital multimedia generation workflows to reduce manual production time.

AI-Powered Student Performance Analysis Dashboard

Stack: Python, Pandas, Data Analytics, Power BI/Tableau, Machine Learning

• Designed an interactive dashboard to track academic performance metrics.

• Conducted EDA and statistical modeling to identify subject trends and learning bottlenecks.

• Built KPI visualizations to provide actionable insights for educators and administrators.

AI Smart Fruit & Vegetable Freshness Tracker — Hackathon Project

Stack: Python, Computer Vision, Machine Learning, Image Processing

• Created an AI vision classifier to categorize produce freshness as Fresh, Moderate, or Spoiled.

• Implemented image preprocessing, feature extraction, and real-time inference for automated visual grading.

AI-Based Travel Organizing Platform — AI & Web Application

Stack: Python, Recommendation Algorithms, React.js, REST APIs

• Developed a trip-planning assistant concept consolidating flights, lodging, and transit into custom itineraries.

• Used recommendation algorithms to calculate multi-day schedules and structured budget estimates.

ACHIEVEMENTS

• Selected for the Pentagon Space internship and training program through competitive campus technical rounds.

• Designed and deployed functional AI/ML prototypes during collegiate hackathons under time constraints.

• Maintained an academic record of 8.1 CGPA in B.E. Artificial Intelligence & Machine Learning at KIT (VTU).

• Completed a Data Science and Machine Learning internship at Infotact.

ADDITIONAL INFORMATION

Languages: English (Fluent), Kannada (Native), Hindi (Conversational)

Availability: Immediate placement and internship joiner
